

Antigen Testing for Events!

Service introduction:

1. The Covid-19 antigen rapid testing procedure will be done by experienced and skilled professionals
2. We can recommend and give feedback on different tests, which would be most cost-effective and userfriendly, as well as which tests would be most suitable for specific event
3. When arriving to pre-event testing, one should always wear a protective mask and have no signs of disease (cough, cold, fever, tiredness)
4. Arrival of people to pre-event rapid testing should be zoned or scattered, to prevent the contacts of untested persons
5. The testing could be done in tents, wide open space buildings etc.
6. Waiting time for test results is 15 minutes from the moment the test sample was taken
7. **In ideal conditions, two persons can test approximately 40 persons per hour.**

The Goal:

The goal is to detect infectious persons before they enter the events and prevent the spreading of the disease. In our experience the best results will be achieved when using Covid-19 antigen rapid testing with other complex measures of infection prevention: wearing protective masks, zoning and spreading the crowd, disinfection of surfaces and hands, proper internal rules of conduct etc)

Portfolio:

Over 50 Covid-19 antigen rapid testings: Eesti laul, Ettevõtlike gala, Nato exercises Locked Shields, Narva vaba lava, online events Protos ja Space Productions, work teams, educations etc.
