Estonia in a nutshell

- population: 1.3 million
- currency: EUR
- official language: Estonian, English widely spoken
- member of: EU, Eurozone, OECD, NATO and Schengen
- capital city: Tallinn (450,000)

One of Europe's Least Crowded Countries

Population: Just 1.3 Million

An aerial photograph of a calm lake surrounded by a dense, lush green forest. The water is dark blue and reflects the surrounding trees. The forest is composed of tall, thin trees, likely pines or spruces, with a thick canopy. The overall scene is serene and natural.

The World's Cleanest Air & Greenest Country

With 70% of Estonia covered by forests and bogs, and over 2,000 islands to explore, the options for authentic, nature-based group activities are endless. According to the 2024 Environmental Performance Index, Estonia ranks as the most environmentally friendly country in the world, and one of only seven to meet WHO's clean air standards.

Europe's Best-Preserved Medieval Old Town

Tallinn's picture-perfect Old Town is one of Europe's best-preserved medieval city centres. A UNESCO World Heritage site, it's a fairytale mix of cobblestone streets, Gothic spires, hidden courtyards, and Hanseatic charm.

Europe's Best Education

A teacher with long brown hair and glasses, wearing a colorful patterned top and a dark skirt, stands in a grassy schoolyard. She is holding a book titled 'ALPA' and looking at a tablet. Five students are gathered around her: three boys on the left and two girls on the right. The boys are wearing dark blue uniforms and holding tablets. The girls are wearing casual clothing; one is holding a tablet. In the background, there is a modern building with a wooden slat facade and large windows, surrounded by trees with green leaves. The scene is brightly lit, suggesting a sunny day.

Estonian students consistently rank at the top in Europe in global education assessments. According to the latest PISA tests, Estonia is first in Europe, and among the highest performers worldwide.

The World's Leading Startup Nation

Often dubbed the Silicon Valley of Europe, Estonia boasts the highest number of start-ups and unicorns per capita on the continent. This compact country punches far above its weight when it comes to innovation, with global success stories like Skype, Wise, and Bolt all having Estonian roots.

Can You Guess
Estonia's Most Famous
Startup?

Most advanced digital society in the world

- 100% of state services are online
- electronic ID, I- voting, E-health, E-School, E-Tax, documents signed digitally in seconds since 2002
- e-Residency - Estonian e-services to every world citizen
- One of Europe's top startup hubs — innovative, connected, and future-ready

Estonia has given an entirely different outlook on what a truly human-centric society entails for digital citizens.

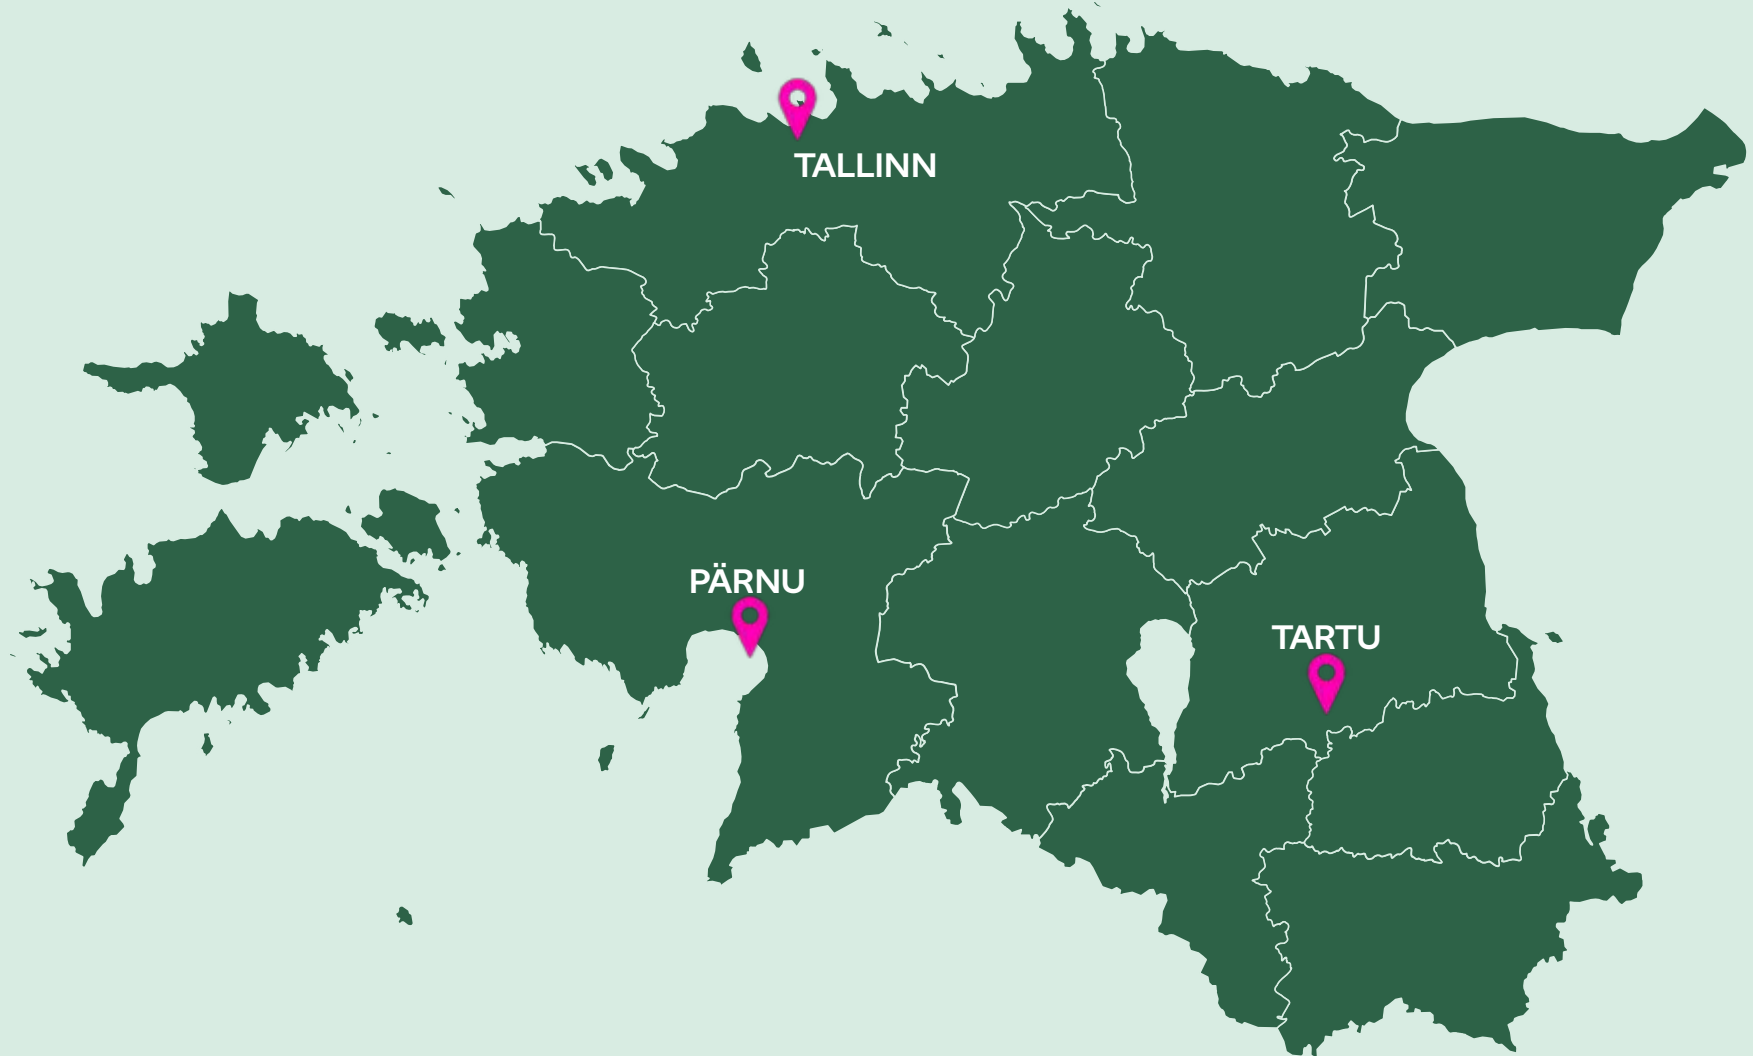

Easy organising

A person is sleeping peacefully in a blue and white striped hammock, which is strung between two large, leafy trees. The hammock is positioned in a lush green field filled with numerous small white daisies and yellow wildflowers. The background shows a rustic wooden fence and a building, all slightly out of focus, creating a serene and idyllic atmosphere. The title 'Easy organising' is written in a large, white, sans-serif font in the upper left corner.
